

AE4EU Newsletter

5th Agroecology for Europe (AE4EU) newsletter - April 2023

AE4EU has entered its final project year. We are happy to share with you the latest news and some upcoming activities and events in this newsletter.

Book launch

Mapping the development of AGROECOLOGY IN EUROPE

Country report series

Volume 1

“Mapping the development of agroecology in Europe” – A collection of country reports

In order to scale up agroecology, it is critical to document and analyse its development in different contexts as a necessary step to attain significant insights about the state of the art of agroecology, as well as to support its expansion and use at the policymaker level. Based on the mapping of agroecology in different European countries, AE4EU (Agroecology for Europe) and Agroecology Europe launched the first volume of a book series that presents the latest findings on the development of agroecology in Europe.

Agroecology for Europe Hub

The Agroecology for Europe Hub developed within the H2020 AE4EU is a **virtual space to connect** all actors interested or involved in agroecology. The **hub's vision** is to **develop** a European network on agroecology. Encouraging networking and exchange of information, the finalities of the Hub are to connect digitally with colleagues and experts, share knowledge, insights and best practice, learn from experiences and inspire innovation and new ways of working in agroecology.

In the Hub, users can share **content and information** illustrating **Living Labs**, farming practices, but also funding opportunities and policy strategies. Everything can be easily **published** and **found online** to create European agroecological connections.

ENAF - the story continues

In our last newsletter, we shared an invitation to the launch of the European Network for Agroecological Food Systems (ENAF) as the next step of what we previously called the 'network of networks'. The launch took place on January 26th and was attended by representatives from a wide range of networks, associations, and EU programmes. Information on the outputs of the launch can be found on our website.

At the end of the event, participants were invited to indicate whether they wanted to be actively involved in the further co-creation of ENAF as a co-founder, just be participants in that process, or whether they just want to stay informed as 'friend' of ENAF. Currently, conversations are being held with those who indicated their interest in being co-founders.

**Webinar:
Development of Agroecology in Sweden and Spain**

Join us on **Tuesday, 9th of May, 16:00 - 17:30 (CET)** for the **AE4EU mapping webinar!**
<https://www.ae4eu.eu/2023/05/09/development-of-agroecology-in-sweden-and-spain/>

Documenting and analysing the development of agroecology in different countries and context is key to enhancing the up and out-scale of agroecology at the European level. Based on the **AE4EU project (Agroecology Europe – www.ae4eu.eu)**, a **mapping of agroecology in Spain and Sweden** was achieved to provide an overview of its development. The webinar will provide key results and discussion for the participants.

Moderators
 Baptiste Girard and Alexander West, ISMA, France

Presenters
 Georg Carlsson (212), Julian Fargas (Agroecology Europe), Maria Rosa Mosquera-Losada (ISCI)

Agenda
 16:00 – 16:30: AE4EU – mapping agroecology in Europe to document and foster its development
 16:30 – 16:50: Main results and outcome from the mapping in Sweden
 16:50 – 18:00: Main results and outcome from the mapping in Spain
 18:00 – 17:30: Exchange with participants

Interested in the mapping? You can download the first volume of the mapping book analysing the development of agroecology in 13 countries! <https://www.ae4eu.eu/mappingbook/>

**AE4EU mapping
webinar Spain &
Sweden**
**9th of May, 16:00 -
17:30 CET**

Within the AE4EU project, a mapping of agroecology in Spain and Sweden was conducted to provide an overview of its development. This webinar will present key results and discuss them with participants.
